Art Unit: 2124

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrases "processing **an input data word**" (independent claims 1 & 15; line 1) are misdescriptive. They should be --input data words--.

3. Applicant's arguments filed on 11-19--03 have been fully considered but they are not persuasive.

Applicant, in his remark argues that "[t]his language in claim 1 must read in context: 'processing an input value data word containing a plurality of abutting input data values'. The full preamble makes clear that an input data word contains a plurality of (possibly two) data values" (emphasis added).

With respect to the arguments, the examiner carefully reviews the specification, drawings and the claimed invention. First, Fig.1 shows TWO input data words<sub>s</sub> (2, 4). Second, Fig. 2 discloses "32-BIT ADD" (element 18). The examiner believes that it implies "32-bit input data words<sub>s</sub> add together". Third, Fig. 3 discloses A and B "words". Also, the specification, page 9, lines 29-30, discloses "[l]ines 26 and 28 **are** 16-bit input data words each containing four 4-bit input data values". Fourth, the claims recites

Art Unit: 2124

"performing one or more data processing operations upon said input data **and** a further data word ..." (claim 1, lines 3-4). Therefore, it is clearly that the preamble of the method should be "**processing input data words** *each* containing a plurality of abutting input data values". The claim does NOT process the "input data values" of a single input data word. The rejection is proper.

4. Claims 1-16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

5. The following is an examiner's statement of reasons for allowance: the recorded references do NOT teach or suggest the claimed "**corrupting result bit**" and "**error correcting word**" features as recited in independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2124

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
